COME LEARN WITH US!

Hands on education is the key to enthusiastic learning!

Let our field trip programs help broaden your student's horizons.

Our Earth Science Museum includes specimens of rocks, minerals and fossils from around the world. Special exhibits include the largest Dinosaur Egg Collection from China on display in United States, a Mining display, Fluorescent Mineral display, Crestmore Quarry display and much more. For an additional \$.50 per person you can add a museum tour to your other programs if it is not already included.

1. Gold Panning - Learn about the California Gold Rush & experience the gold panning process using Pyrite & minerals found with gold.
2. Gold Panning - Learn about the California Gold Rush & the process of panning for real gold using a sluice box, and keep the gold you find.
3. Rock Collecting at the Dinosaurs - Learn about minerals, how rocks and fossils are formed, see the life-size dinosaurs as you hike up to dinosaur plateau, and collect 12 rock & mineral specimens of your very own. A round trip of approximately one-half mile.
4. Introductory Lapidary - Learn about the art of lapidary, the cutting, shaping and polishing of rocks and minerals. Design your own tile mosaic or necklace with an assortment of polished stones.
5. Indian Pictograph - Learn about the world of the Native Americans, then draw and keep your own Pictograph using the same natural materials they did.
6. Ethno-Botany - Learn about the plants and animals important to the Native Americans and Pioneers that were used for food, medicine and tools. Explore and identify plants here on the grounds of the Center. Make your own leaf and plant identification booklet.
7. California Rockbound - Students will learn about minerals, how they are formed and their uses in our daily life. Identify 16 specimens in a set to take home.
8. Fossil Shack - Learn about fossils and how they are formed, then clean and prepare your very own to take home.
9. Dinosaur Dig - Become a paleontologist for a day. Learn about ancient life preserved as fossils, then dig for real dinosaur bone in our simulated dig site.
10. Archaeological Dig - Become an archaeologist for a day. Explore ancient cultures and their significance in history, then discover real artifacts in our simulated archaeology dig site. Receive an arrowhead for your efforts.
11. Adobe Brick Making - Learn about the history of adobe brick making and its importance to the California Missions then make adobe bricks in a hands and feet-on activity for all ages.
12. Geology of California - Explore the ins and outs of the geological processes that have shaped California, from earthquakes to mountain building and glaciers. Explore the amazing geological features of our state. Class includes a rock collection to take home.
13. Ice Age Mammals - Explore the ancient mammals, their lives and habitats, with an emphasis on those discovered in California such as the Mammoth, Saber-Tooth & Sloth.
14. Magic of Minerals - Use your five senses, touch, taste, smell, hearing and sight to discover the magic of rocks and minerals. You will take home a collection of your very own.

ALL PROGRAMS CAN BE TAILORED FOR A PARTICULAR AGE GROUP.

Jurupa Mountains Discovery Center
